Professional Experience

Appstango Lehi, UT *Software Development – Senior Project Manager* – May 2022 – Present

- Lead multiple development teams locally and remotely (India) in the scoping, CI/CD development and management of various software projects such as the complete redesign of the Essential Life app.
- Improve the processes of initial project scopings by implementing Figma libraries and prototypes to our toolkit.
- Maintain friendly professional relationships with clients which have led to new and continued development of projects after initial projects were delivered.
- Track the progress and performance of the project, along with the performance and efficiency of their team members.
- Execute deliverables that adhere to strict budgetary and scheduled deadlines.

Contracted Web Developer *Freelance – Web Development* – March 2015 – August 2019

- Conceptualized and conceived wireframe designs from client requests to design various websites for local businesses.
- Implemented responsive, straightforward, functional UI to allow visitors on any device to have the same experience.
- Oversaw updates and QA testing of websites and implemented enhancements that significantly improved web functionality and speed
- Committed over 100 website changes to improve user flow and understanding of platform experiences and features.

Utah Valley University

Associate in Science 2018

Additional courses completed- C#, UI/UX Web Design, Web Essentials, Scripting Internet Technologies

Continuous Education and Personal Development

Currently involved in a 24 week online Software Engineering Program curriculum (App Academy Bootcamp) to keep my skills fresh and familiarize myself with additional languages, becoming fluent in as many languages as possible is my passion and commitment to my personal growth.

In addition, I continually teach myself about cutting edge technologies and best practices in the industry and their use and application in the real world.
